Question #21

Topic 1

You are configuring Microsoft Cloud App Security.

You have a custom threat detection policy based on the IP address ranges of your company's United States-based offices.

You receive many alerts related to impossible travel and sign-ins from risky IP addresses.

You determine that 99% of the alerts are legitimate sign-ins from your corporate offices.

You need to prevent alerts for legitimate sign-ins from known locations.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Configure automatic data enrichment. **Most Voted**
- B. Add the IP addresses to the corporate address range category. **Most Voted**
- C. Increase the sensitivity level of the impossible travel anomaly detection policy.
- D. Add the IP addresses to the other address range category and add a tag.
- E. Create an activity policy that has an exclusion for the IP addresses.

Correct Answer: AB

Question #22

Topic 1

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen. You are configuring Microsoft Defender for Identity integration with Active Directory.

From the Microsoft Defender for identity portal, you need to configure several accounts for attackers to exploit.

Solution: You add each account as a Sensitive account.

Does this meet the goal?

A. Yes

B. No

Question #23

Topic 1

You have a Microsoft 365 tenant that uses Microsoft Exchange Online and Microsoft Defender for Office 365.

What should you use to identify whether zero-hour auto purge (ZAP) moved an email message from the mailbox of a user?

A. the Threat Protection Status report in Microsoft Defender for Office 365

Most Voted

B. the mailbox audit log in Exchange

C. the Safe Attachments file types report in Microsoft Defender for Office 365

D. the mail flow report in Exchange

Correct Answer: A

Question #24

Topic 1

You have a Microsoft 365 subscription that contains 1,000 Windows 10 devices. The devices have Microsoft Office 365 installed.

You need to mitigate the following device threats:

- Microsoft Excel macros that download scripts from untrusted websites
- Users that open executable attachments in Microsoft Outlook
- Outlook rules and forms exploits

What should you use?

A. Microsoft Defender Antivirus

B. attack surface reduction rules in Microsoft Defender for Endpoint

Most Voted

C. Windows Defender Firewall

D. adaptive application control in Azure Defender

Correct Answer: B

B (100%)

Question #25

Topic 1

You have a third-party security information and event management (SIEM) solution.
You need to ensure that the SIEM solution can generate alerts for Azure Active Directory (Azure AD) sign-events in near real time.
What should you do to route events to the SIEM solution?

- A. Create an Azure Sentinel workspace that has a Security Events connector.
- B. Configure the Diagnostics settings in Azure AD to stream to an event hub. **Most Voted**
- C. Create an Azure Sentinel workspace that has an Azure Active Directory connector.
- D. Configure the Diagnostics settings in Azure AD to archive to a storage account.

Correct Answer: B

DRAG DROP -

You have an Azure subscription linked to an Azure Active Directory (Azure AD) tenant. The tenant contains two users named User1 and User2. You plan to deploy Azure Defender. You need to enable User1 and User2 to perform tasks at the subscription level as shown in the following table.

User	Task
User1	- Assign initiatives - Edit security policies - Enable automatic provisioning
User2	- View alerts and recommendations - Apply security recommendations - Dismiss alerts

The solution must use the principle of least privilege. Which role should you assign to each user? To answer, drag the appropriate roles to the correct users. Each role may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. Select and Place:

Roles

Contributor

Owner

Security administrator

Security reader

Answer Area

User1:

User2:

Correct Answer:

Roles

Contributor

Owner

Security administrator

Security reader

Answer Area

User1:

Owner

User2:

Contributor

Box 1: Owner -

Only the Owner can assign initiatives.

Box 2: Contributor -

Only the Contributor or the Owner can apply security recommendations.

Question #27

Topic 1

HOTSPOT -

You have a Microsoft 365 E5 subscription that contains 200 Windows 10 devices enrolled in Microsoft Defender for Endpoint. You need to ensure that users can access the devices by using a remote shell connection directly from the Microsoft 365 Defender portal. The solution must use the principle of least privilege.

What should you do in the Microsoft 365 Defender portal? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

To configure Microsoft Defender for Endpoint:

	▼
Turn on endpoint detection and response (EDR) in block mode	
Turn on Live Response	
Turn off Tamper Protection	

To configure the devices:

	▼
Add a network assessment job	
Create a device group that contains the devices and set Automation level to Full	
Create a device group that contains the devices and set Automation level to No automated response	

Correct Answer:

Answer Area

To configure Microsoft Defender for Endpoint:

	▼
Turn on endpoint detection and response (EDR) in block mode	
Turn on Live Response	
Turn off Tamper Protection	

To configure the devices:

	▼
Add a network assessment job	
Create a device group that contains the devices and set Automation level to Full	
Create a device group that contains the devices and set Automation level to No automated response	

Box 1: Turn on Live Response -

Live response is a capability that gives you instantaneous access to a device by using a remote shell connection. This gives you the power to do in-depth investigative work and take immediate response actions.

Box: 2 -

Network assessment jobs allow you to choose network devices to be scanned regularly and added to the device inventory.

Question #28

Topic 1

HOTSPOT -

You have a Microsoft 365 subscription that uses Microsoft 365 Defender and contains a user named User1.

You are notified that the account of User1 is compromised.

You need to review the alerts triggered on the devices to which User1 signed in.

How should you complete the query? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

DeviceInfo

| where LoggedOnUsers contains 'user1'

| distinct DeviceId

| kind=inner AlertEvidence on DeviceId

extend

join

project

take

Correct Answer:

DeviceInfo

| where LoggedOnUsers contains 'user1'

| distinct DeviceId

| kind=inner AlertEvidence on DeviceId

extend

join

project

| project AlertId

| join AlertInfo on AlertId

| AlertId, Timestamp, Title, Severity, Category

project

summarize

take

Box 1: join -

An inner join.

This query uses kind=inner to specify an inner-join, which prevents deduplication of left side values for DeviceId.

This query uses the DeviceInfo table to check if a potentially compromised user (<account-name>) has logged on to any devices and then lists the alerts that have been triggered on those devices.

DeviceInfo -

//Query for devices that the potentially compromised account has logged onto

| where LoggedOnUsers contains '<account-name>'

| distinct DeviceId

//Crosscheck devices against alert records in AlertEvidence and AlertInfo tables

| join kind=inner AlertEvidence on DeviceId

| project AlertId

//List all alerts on devices that user has logged on to

| join AlertInfo on AlertId

| project AlertId, Timestamp, Title, Severity, Category
DeviceInfo LoggedOnUsers AlertEvidence "project AlertID"

Box 2: project -

Question #29

Topic 1

You have a Microsoft 365 E5 subscription that uses Microsoft SharePoint Online.
You delete users from the subscription.
You need to be notified if the deleted users downloaded numerous documents from SharePoint Online sites during the month before their accounts were deleted.
What should you use?

- A. a file policy in Microsoft Defender for Cloud Apps
- B. an access review policy
- C. an alert policy in Microsoft Defender for Office 365

D. an insider risk policy **Most Voted**

Correct Answer: D

Question #30

Topic 1

You have a Microsoft 365 subscription that has Microsoft 365 Defender enabled.
You need to identify all the changes made to sensitivity labels during the past seven days.
What should you use?

- A. the Incidents blade of the Microsoft 365 Defender portal
- B. the Alerts settings on the Data Loss Prevention blade of the Microsoft 365 compliance center

C. Activity explorer in the Microsoft 365 compliance center **Most Voted**

D. the Explorer settings on the Email & collaboration blade of the Microsoft 365 Defender portal

Correct Answer: C
